TO: The FCC

I would like to express my concern about the possibly of low power FM stations replacing or taking precedence over FM translators. I listen to K-LOVE transmitted from 96.3 and 89.9 almost everyday. The content of this format is uplifting and extremely positive. It contains strong Christian music and Christian programming. It brings short news briefs that is direct and trustworthy. I am confident that replacement of this programming would be detrimental to the community. As a minister and Christian counselor I have used this station as a means of therapy. The mind is where many battles are won or lost. There is so much negative vibes in our world today we need all the uplifting and encouragement we can obtain. This is where this station has its strength. Please do not allow this possibility come to the point of eliminating the positive impact in our communities. Thank you.
